A BERKSHIRE HATHAWAY COMPANY

In-store traffic is down, but customers are spending more per trip.

Whether inside the store or not, your customers are demanding safe, fresh, contact-free retail experiences. Our C-Store solutions provide the tools to drive more traffic and grow your on-the-go food and beverage program from your beverage bars to your beverage coolers. From your made-to-order to grab-and-go sections, we can outfit your store.

Several trends drive the need for efficient, on-the-go food options.

**C-STORES ARE #1 FOR
SNACKING & GRAZING**

**CONTACTLESS AND
TOUCHLESS**

**FOCUS ON SAFETY
AND SANITATION**

**DELIVERY, MOBILE
AND CURBSIDE**

While a majority of convenience store retailers expect their in-store traffic to increase in 2021, this is a drop of 13 points compared to last year. One in three retailers are expecting more of the same in 2021 in regard to foot-traffic levels.¹

Increasing spend per visit is key.

A BERKSHIRE HATHAWAY COMPANY

Q: When you are hungry, where do you typically go for a snack or beverage?
% of time mentioned by consumers

When consumers are looking for a snack or beverage, convenience stores are the number one choice.²

Some of the most common changes retailers expect are touchless technology, more staff-serving with more limited interaction with shoppers as touchless and delivery systems expand.²

85%

of retailers expected the pandemic to increase the importance of food **safety and sanitization** methods.²

58%

of retailers say **delivery, mobile ordering, curbside pickup** will become more common than in-store foodservice purchasing.²

Dispensing solutions

Cornelius® Viper™ Remote 3 Flavor

- Patented Intelligent Defrost™ automatically skips a defrost when it's not needed, keeping you running during peak demand
- Industry-leading manufacturing quality checks and a team of dedicated engineers ensure the highest quality of equipment
- Industry-leading 3-minute defrost recovery time to get you up and running faster than ever
- Lockout defrost feature ensures that your daily rush is uninterrupted and profits will keep flowing
- Quickly access manuals and easy-to-follow service videos via QR code to reduce maintenance and service times

Cornelius® IDC Pro™

- Revolutionary interactive platform
- Fun and easy new scrolling interface for brand selection
- Contemporary design
- Large digital merchandising and promotional space
- 20 brands (10 per side) 8 Flavors (4 per side)
- Easy-to-clean splash panel
- Standard BIB syrup
- Dual pivot door
- Dual-dispense nozzle integrated ice maker kit
- On-board diagnostic service
- Dual-touch screen and user interface
- DC platform cold carb multi-flavor valves

Cornelius® WCC-700A Carbon Chunklet Ice Maker

- Design features seamless look
- Durable, corrosion-free stainless steel exterior is paired with an easy-to-clean plastic front panel
- High-yield capability is ideal for use in demanding, high-volume applications
- Environmentally-responsible compressor is energy-efficient and uses CFC-free, R-404A refrigerant
- Responsibly uses 100% of water supply

Cornelius® Enduro™ 300

- Highly-efficient LED illuminated merchandiser provides a high-impact visual display
- Gravity ice dispensing provides excellent ice targeting into two separate ice dispensing chutes
- Ice used to cool cold plate is separate from ice dispensed into cups
- One-piece ABS thermoformed plastic (Durabide™ design) provides durability and ensures all ice in hopper is dispensable
- Modular design allows for easy component access from the front of the unit
- TotalFlex™ technology allows for easy changes from carbonated to non-carbonated

Cornelius® NitroPro™ Mini

- Proprietary tank-free nitro generator delivers smooth and creamy, long-lasting cascade without the cost of extra equipment
- Frost-free refrigeration supports ambient or aseptic concentrate bag-in-box liquid packaging
- Robust design and reliable controls in a small footprint requires only water and electrical connections.
- Simple bag-in-box technology means no manual mixing, no filling
- Versatile dual-tap design dispenses chilled nitro and cold beverages in one dispenser
- LED-backlit graphics grab customers attention and increase demand for premium drinks

Cornelius® Ice Maker Dispenser

- Meets the growing trend for chewable ice preferred by consumers
- High-yield capacity of up to 360 lbs (163 kgs) per day ice-making production
- Convenient, removable easy-to-clean air filters
- Corrosion-free, stainless steel exterior
- Energy and water efficient

Cornelius® Touchless Beverage and Ice Dispense

- The touchless valve with cup sensing technology make it easy for customers and crew to single-handedly dispense any size beverage
- Our new LED indicators offer intuitive visual dispensing cues familiar to most operators
- Touchless ice dispense supports all ice types and a variety of cup types (up to 52 oz)
- Avoid messy spills with enhanced pour features with faster response times and top-off capabilities with immediate shut-off
- No need to buy new equipment, simply upgrade to touchless for existing SFV1, UFB and UF1 valves with no brixing required

Display solutions

Display Technologies® Visi-Slide®

- Ideal for coolers or cold vaults where height limitations are a factor, floor height is 5/16"
- Modular glide and break offs fit most shelves
- Proprietary internal slip agent ensures lasting performance
- Ring allows for maximum brand exposure
- Made of virgin polypropylene and easily recycled

Display Technologies® Visi-FAST® Flat-Shelf Pusher Glide

- Optimize your customer's ability to shop within tight spaced shelving with unique scooped front lens
- Keep your branded products upfront and center with pre-installed integrated pusher
- Maximum brand exposure with clear front lens
- Maximum product stability and no tipping with high-side walls
- Break-offs with repositionable back panel for additional depths
- Proprietary internal slip agent ensures long lasting glide rack performance

Display Technologies® Visi-Clear® Clear Front Beverage Glides

- Clear ring fronts and black low-profile floor allows for beverages of different sizes
- Scooped lens design for improved shop ability
- Durable virgin polycarbonate clear fronts
- Tray is produced from recycled plastics
- Custom branding available (MOQ)

Holding solutions

Prince Castle® Dedicated and Modular Holding Bins

- Maintain an inventory of cooked protein and sides during peak periods so you can assemble to order
- Eliminate a known bottleneck caused when part of an order is not ready
- Reallocate Labor from grilling to allow them to focus on alternate tasks
- Keep protein and sides at the desired temperature without drying out during non-peak hours to ensure you are ready for an in-coming order
- Reduce waste by extending the food holding time, especially as protein costs increase
- Keep add-on items at the drive-thru window for immediate hand-off to customer

PRINCECASTLE[™]

Toasting solutions

PRINCECASTLE™

Prince Castle® CTD/CTDE Toasters

- Automate the bun toasting to achieve the perfect golden brown, warm toast every time
- Free up grill space to allow for additional cooking surface
- Maintains the “just-made” quality of the sandwich by sealing in the heat and retaining bun texture, eliminating sogginess
- Fast toast speeds to reduce the wait time to start assembling your sandwich or burger

Slicing solutions

SK | **SABER KING**

Saber King® Slicing

- Save time by slicing multiple products with a single piece of equipment allowing you to re-purpose crew members
- Faster prep time and minimal waste with improved slice consistency which increases speed when cutting large volumes of produce
- Easy interchangeable color-coded blade cartridges help to quickly identify any food type and switch between different types of food and cuts
- The ability to adapt to the high demands from increased drive-thru traffic makes food prep faster and more efficient with minimal waste
- Safely providing maximum versatility to keep up with ever-changing menus peak period

Refrigeration solutions

Silver King® Display Cases and Merchandisers

- Exterior stainless steel with galvanized bottom reduces risk of corrosion
- Interior aluminum coved corners and finished edges for easy cleaning
- Environmentally-friendly polyurethane foamed-in-place insulation for maximum strength and durability
- Supplied with adjustable 4" legs or can also be mounted to a wall
- Automatic condensate evaporator means no plumbing or floor drains
- Adjustable temperature control mounted on the side for easy access

SILVER KING®

Silver King® Refrigerated Pizza Prep Table

- Exterior stainless steel with galvanized back and bottom
- Interior aluminum coved corners and finished edges for easy cleaning
- Environmentally friendly polyurethane foamed-in-place insulation for maximum strength and durability
- Superior door construction with polyurethane insulation, stainless steel exterior and extra heavy duty magnetic “Thermo Rubber” door gaskets combined to make the toughest, longest lasting door in the industry
- Cutting boards are constructed of high quality, durable polyurethane
- Three-wire power cord is a standard 8-feet in length with a NEMA 5-15P plug
- 5” heavy-duty casters with two locks are supplied and threaded into rivnuts and secured to a 12-gauge steel base to ensure durability
- CFC-free, high-efficiency, self-contained refrigeration system with automatic defrost and forced air circulation uses R404A refrigerant

Support solutions

Marmon Renew™ Beverage Remanufacturing

- All equipment received goes through a 14-point inspection process
- New flexible hoses, tubing and o-rings are replaced regardless of apparent condition
- Regrained stainless is used and painting is applied in our state-of-the-art paint booth
- Multiple testing takes place throughout the process and is documented to meet or exceed manufacturers requirements
