

Prince Castle Announces Green Power Partnership

CAROL STREAM, IL – Prince Castle, a Marmon/Berkshire Hathaway Company, is pleased to announce their Green Power Partnership with MidAmerican Energy services (also known as Berkshire Energy company) and purchased 100% RECs (renewable energy credits) as part of their electric supply agreement for Carol Stream, IL.

“Today, renewable power is not only cleaner but also safer and affordable,” says Donald Sweeney, President of McDonald’s Business Unit. “We at Prince Castle are proud of our Partnership with MidAmerica Energy services and is committed to meeting the challenge to deliver clean energy while raising awareness as an environmental steward.”

By making this investment, Prince Castle, Inc. is committed to the ongoing development of renewable assets (also known as wind and solar) to help reduce the carbon footprint from the use of fossil fuels and to help create a cleaner more sustainable future for generations to come.

The purchase or use of renewable energy credit ensures the electricity provided to Prince Castle is from a renewable source that produces zero-emissions. As the physical electricity received through the utility grid says nothing of its origin or how it was generated, renewable energy credits play an essential role in accounting and assigning ownership to the attributes of renewable electricity generation and its use. Renewable energy credits legally convey the attributes of renewable electricity generation, including the emissions profile of that generation. The renewable energy credit serves as a title to promote the use of renewable energy sources and actively encouraging the development of environmentally friendly technologies.

About Prince Castle

Prince Castle with headquarters in Carol Stream is a global foodservice equipment manufacturer that specializes in developing quality products to the world’s premier restaurant operators. Founded in 1955, Prince Castle has not only been a pioneer and innovator of new technologies, but is also known for its dedication to helping the world’s leading restaurant brands improve its operations, so they can consistently serve a great-tasting product quickly and safely. With its understanding and knowledge of the tight relationship between operational execution and product menu, Prince Castle optimizes both when it comes to developing kitchen equipment.

Prince Castle operates additional manufacturing and distribution facilities in Shanghai, China, and Plymouth, MN. Visit www.princecastle.com for more information.
